

## Access Humboldt Digital Media Resources Questionnaire

Access Humboldt is surveying Humboldt County digital media resources (institutions, organizations, programs, festivals, businesses, schools/classes, etc.) to determine the following:

A) what areas of the county and/or specific populations are most in need of additional digital media programs, and

B) what types of digital media programs are most needed.

To the best of your ability, please complete the following short questionnaire about your digital media resource. We will use this information to assess how best to coordinate existing federal, state, and local resources to support digital media programs in Humboldt County.
